FLYtag®

World N°1
Flyable RFID tag

Gold standard for Aerospace
TECHNOLOGY BY MAINTAG

2011 RFIDlab benchmark
FLYtag® rank #1

BENCHMARK

The FLYtag by MAINTag was challenged in the frame of a technical survey performed by an international and reliable independent lab. The FLYtag was awarded #1 in 80% of the test metrics among all AS5678 RFID tags offering high memory and global frequency:

- #1 in MEP (Minimum Effective Power) for EU & US frequencies,
- #1 in orientation sensitivity,
- #1 in reading distances,
- #1 in handheld reading distances,

These outstanding results are due to heavy R&D investment in MAINTag's RFID Lab. We will keep on providing you with the #1 worldwide aerospace dedicated RFID tags.

AS/EN9100 & I.P.C.A.

EN9100 certification for Aerospace: MAINTag pass with success the Aerospace AS/9100 certification becoming **the first and only company selling RFID tags AS/EN9100 CERTIFIED**. MAINTag has also successfully passed the IPCA (Industrial Process Control Assessment) step with the rank B and demonstrate the capability of the company to supply aerospace customers according to aircraft manufacturer requirements for the overall manufacturing and procurement process. Again this important industrial assessment gives MAINTag products several steps ahead.

EN 9100
BUREAU VERITAS
Certification

Tools Tracking

FLYtag™ Nano IM is an UHF RFID tag based on MAINTag patented technology suitable for aircraft and Industrial parts marking in harsh environment "IN METAL" and offer up to 1m reading distance. Sample tags may be available before full production, so please don't hesitate to request some by sending an email.

FLYtag MANAGER V2.0

New version of the ATA spec2000 reference software

FLYtag Manager V.2.0 (ATA Spec 2000 software)

The reference of ATA SPEC200 software

- Quicker, simpler, easier,
- Export data through PC data viewer XML format.
- Helps avoiding encoding mistakes,
- Capable to scan 1D/2D barcodes from computer screen,
- Camera with Flash,
- Operators may encode a tag without even using the touch screen !

FLYtag[®]V2 Manager

MOBIpad AT2

- more power enabling improved reading distances,
- lighter though offering larger battery lifespan,
- Hosting FLYtag Manager V.2.0,
- cheaper !

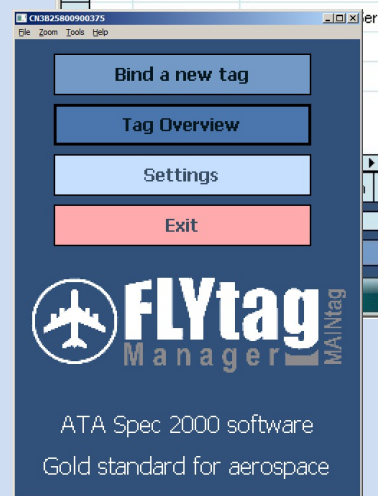

MOBIpad AT2 replaces CN3 Launch Pack. Customers having purchased FLYtag Launch pack CN3 or MOBIpad CN3 may contact us for preferred rates on FLYtag Launch Pack AT2 or MOBIpad AT2.

Training sessions

FLYtag Manager Training:

- Introduction to RFID Technology
- Introduction to FLYtag range (tags, readers, software, services)
- Introduction to ATA Spec 2000
- Encoding tools training (data encoding and reading)
- "FLYtag manager" & "Viewer" installation, setting and use training
- Issues possibly met by user training
- Q&A
- Includes trainer's travel and 2 demo equipment
